PROFILE

I am a dedicated and detail-oriented Full Stack Web Developer with over one year of professional experience. My expertise lies in developing dynamic, secure, and user-friendly web applications. I am passionate about learning new technologies and continuously improving my skills.

EXPERIENCE

FULLSTACK

Company Website Revenulytics | 2023 - Present

- Developed a dynamic website featuring full CRUD (Create, Read, Update, Delete) functionality with Laravel.
- Implemented secure user authentication and authorization.
- Designed and styled the user interface with CSS for a modern and responsive design and some Tailwind on Blogs
- Ensured robust backend development and seamless user experience with search query function on blogs and other types of filtering base on author and category.
- Used a Rich Text Editor on the Blogging part of the Website with filter to only allow certain HTML codes on the SQL.
- GitHub for version control.
- Open Graph for a rich social media sharing .
